

SCOR DS (Digital Standard)

Professional Training Course

Contents

This 3 days course has been created to respond to the needs of professionals new to the Supply Digital Standards (SCOR-DS) framework and implementation body of knowledge. Based on a solid repository of improvement program metrics and processes, SCOR has evolved to version 14, so called SCOR DS, becoming an important performance management tool for companies seeking to elevate their supply chain performance. This course has been specifically designed to provide all types of professionals involved with supply chain:

- Foundation knowledge of the SCOR/SCOR-DS frameworks;
- An understanding of how a supply chain performance team would utilize SCOR/SCOR DS in an improvement program implementing the *Transformation Learning Program (TLP)*
- A comprehensive outline of the phases of a typical SCOR/SCOR-DS improvement program.

Completion of the SCOR-DS course will greatly improve participants' knowledge and ability to utilize the SCOR-DS framework and body of knowledge as they embark on their own supply chain improvement programs.

Course objectives

Through classroom discussion and practical, hands-on exercises participants will be able to:

- Understand the origins and goals of the SCOR DS framework;
- Understand the structure of the SCOR DS;
- Work with the four central parts of the SCOR DS framework: *Performance, Processes, Practices, People* and *Special Applications*;
- Develop a SCOR DS improvement program;
- Understand the five phases of a typical SCOR DS improvement program;
- Apply the SCOR DS framework to an improvement project.

By the conclusion of the course, participants will acquire practical tools and Instructor case studies to use as they embark on a major supply chain improvement program. Don't miss your chance to gain an in-depth understanding of the SCOR DS model and demonstrate your commitment to your organization's supply chain performance.

Dates, format and schedule:

4 days (e.g, 09.00:13.00, 14.00-17.30), (Minimum Number of Participants 4/Maximum Number of Participants 10).

Delivery Method: F2F, Virtual Classroom, Hybrid

Course Outline

Day 1: Framework explanation

- Introduction to the SCOR DS Framework
- Using the SCOR DS Resources
- SCOR DS *Performance* : Definition, Attributes, Levels
- SCOR DS *Processes* : Definition
- SCOR DS *Processes* and the Supply Chain
- SCOR DS *Processes* : Levels
- SCOR DS *Practices* : Definition
- SCOR DS *People* : Definition
- *Special Applications* SCOR DS : Definition

Days 2: SCOR DS Improvement Program: Concepts and Practices

SCOR DS Improvement Program Racetrack: Introduction

- **SCOR DS Program Phase 1 – *Engage***
 - Motivations for Undertaking a SCOR DS Improvement Program
 - SCOR DS Improvement Program Organization
- **SCOR DS Program Phase 2 – *Define***
 - Creating the *Supply Chain Definition Matrix*
 - *Improvement Program Charter*
- **SCOR DS Program Phase 3 – *Analyze***
 - SCOR DS Level 1 and Level 2 Metrics Selection
 - Benchmarking
 - Creating a SCORcard
- **SCOR DS Program Phase 4 – *Plan***
 - Create Preliminary Project Portfolio
 - Prioritization and Projects Sequencing
- **SCOR DS Program Phase 5 – *Launch***
 - Improvement Project Charter
 - Project Test, Pilot, and Rollout

Days 3: Transformation Learning Program tools

- The new attributes and metrics of SCOR DS framework;
- TLP and tools in a SCOR DS® project implementation: from *engage* to *launch* (*case study*);

Days 4: Recap and “Real World” example

- SCOR DS “light” approach by Concept in SME (small&medium enterprises); case studies and examples.

Price

ASCM members: 2500€/person + V.A.T. 22% , if needed;

ASCM non members: 3000€/person + V.A.T. 22%, if needed.
