## Session 1—Introduction to Supply Chain Management

<b>Introduction to Manufacturing.....</b>	<b>1-9</b>
Role of Manufacturing.....	1-9
Global Citizenship.....	1-11
Manufacturing Business Model.....	1-15
Business Environment.....	1-23
<b>Manufacturing Environment and Process Choices.....</b>	<b>1-27</b>
Manufacturing Environments.....	1-27
Product Life Cycle and Manufacturing Environments.....	1-33
Choice of Processes and Layouts.....	1-35
<b>The Manufacturing Supply Chain.....</b>	<b>1-45</b>
The Supply Chain Concept.....	1-45
Views of the Supply Chain.....	1-47
Supply Chain Organizational Issues.....	1-51
Performance Measures.....	1-53
Role of Materials Management.....	1-55
<b>Manufacturing Planning and Control.....</b>	<b>1-57</b>
Objectives of Manufacturing.....	1-57
Priority and Capacity Planning.....	1-57
Manufacturing Planning and Control Hierarchy.....	1-59
<b>From MRP TO ERP.....</b>	<b>1-61</b>
From MRP to ERP.....	1-61
From MRP to MRP II.....	1-61
From MRP II to ERP.....	1-63
<b>Impact of New Systems and Philosophies.....</b>	<b>1-65</b>

## Session 2—Demand Management

<b>Demand Management Processes.....</b>	<b>2-7</b>
Marketing Management.....	2-7
Customer Relationship Management.....	2-11
Demand Planning.....	2-11
<b>Characteristics of Demand.....</b>	<b>2-13</b>
Independent Versus Dependent Demand.....	2-13
Sources of Demand.....	2-13
Demand Patterns and Stability.....	2-15
<b>Forecasting.....</b>	<b>2-19</b>
Purposes and Uses of the Forecast.....	2-19
Principles of Forecasting.....	2-21
Data Collection and Preparation Principles.....	2-23
<b>Forecasting Techniques.....</b>	<b>2-25</b>
Qualitative Techniques.....	2-25
Quantitative Techniques: Extrinsic.....	2-25
Quantitative Techniques: Intrinsic.....	2-27
Moving Average Forecast.....	2-27
Exponential Smoothing.....	2-35
Seasonal Forecast.....	2-39
<b>Tracking the Forecast.....</b>	<b>2-43</b>
Bias.....	2-43
Random Variation (Error).....	2-43
Measuring Forecast Error.....	2-45

## Session 3—Master Planning

<b>Purpose and Scope of Master Planning.....</b>	<b>3-7</b>
Priority Planning.....	3-7
Planning Horizon and Level of Detail.....	3-7
<b>S&amp;OP and Production Planning.....</b>	<b>3-9</b>
Sales and Operations Planning.....	3-9
Production Planning.....	3-11
<b>Master Scheduling and Master Production Schedule.....</b>	<b>3-37</b>
Purpose.....	3-37
Objectives.....	3-37
Inputs.....	3-39
Relationship to the Production Plan.....	3-39
Developing a Master Schedule.....	3-41
Projected Available Balance.....	3-41
Preliminary MPS.....	3-43
Planning Horizon.....	3-47
Time Fences and Zones.....	3-49
Aggregating the Master Schedules.....	3-49
Rough-Cut Capacity Planning.....	3-51
Resolving Differences and Publishing the MPS.....	3-51
<b>Master Scheduling and Sales.....</b>	<b>3-53</b>
MPS and Delivery Promises.....	3-53

## Session 4—Material Requirements Planning (MRP)

<b>Material Requirements Planning Environment.....</b>	<b>4-7</b>
Nature of Demand.....	4-7
Linkages with Other Manufacturing Planning and Control Functions.....	4-7
Objectives of MRP.....	4-9
MRP Process Inputs and Outputs.....	4-11
Planning Software.....	4-13
<b>Bill of Material.....</b>	<b>4-15</b>
Introduction.....	4-15
Summarized Bill of Material and the Indented Bill.....	4-15
Single-Level Bill of Material.....	4-17
Multilevel Bill of Material.....	4-17
Parent-Component Relationship.....	4-17
Bill of Material: Summary.....	4-19
Planning Bill.....	4-23
Where-Used and Pegging Data.....	4-25
Uses of the Bill of Material.....	4-27
<b>Material Requirements Planning Logic.....</b>	<b>4-29</b>
Approach to this Section.....	4-29
MRP Logic Overview.....	4-29
Lead-Time Offsetting and Exploding.....	4-31
Gross and Net Requirements.....	4-37
Basic MRP Record.....	4-41
Capacity Requirements Planning.....	4-47
<b>Using and Managing the Priority Plan.....</b>	<b>4-49</b>
Role of MRP Software.....	4-49
Order Control.....	4-51
Releasing Planned Orders.....	4-53
Maintaining Priorities and Replanning.....	4-55

## Session 5—Capacity Management and Production Activity Control

<b>Introduction.....</b>	<b>5-7</b>
Manufacturing Planning and Control Hierarchy.....	5-7
Transition from MRP to CRP and PAC.....	5-7
<b>Capacity Management.....</b>	<b>5-9</b>
Phases of Capacity Management.....	5-9
Definition of Capacity.....	5-11
Capacity Planning Process.....	5-11
Determining Capacity Available.....	5-13
Rated Capacity.....	5-21
Demonstrated Capacity.....	5-25
<b>Capacity Requirements Planning.....</b>	<b>5-27</b>
Introduction.....	5-27
Key Inputs.....	5-27
CRP Process.....	5-33
<b>Production Activity Control.....</b>	<b>5-41</b>
Objectives.....	5-41
Functions.....	5-43
Information Requirements.....	5-45
Data Requirements.....	5-47
<b>Scheduling.....</b>	<b>5-49</b>
Introduction.....	5-49
Scheduling and Loading Techniques.....	5-49
Bottleneck Scheduling.....	5-53
<b>Implementation.....</b>	<b>5-55</b>
Shop Order Packet.....	5-55
Order Release Process.....	5-55
<b>Control.....</b>	<b>5-57</b>
Goals, Objectives, and Control Levers.....	5-57
Priority Control.....	5-59
Input/Output Control.....	5-61
Flow Control.....	5-67

## Session 6—Aggregate Inventory Management

<b>Introduction to Inventory.....</b>	<b>6-7</b>
What is Inventory?.....	6-7
Aggregate and Item Inventory Management.....	6-9
<b>Aggregate Inventory Management.....</b>	<b>6-11</b>
Inventory and the Flow of Materials.....	6-11
Reasons for Carrying Inventory.....	6-13
Functions of Inventory.....	6-15
Inventory Objectives.....	6-17
<b>Inventory Costs.....</b>	<b>6-21</b>
Item Costs.....	6-21
Carrying Costs.....	6-23
Ordering Costs.....	6-25
Stockout Costs.....	6-29
Capacity-Related Costs.....	6-29
<b>Financial Statements and Inventory.....</b>	<b>6-33</b>
Balance Sheet and Income Statement Accounts.....	6-33
Balance Sheet.....	6-35
Income Statement.....	6-37
Aggregate Inventory Management and Financial Statements.....	6-39
Cash Flow Analysis.....	6-43
Inventory Valuation.....	6-45
Financial Inventory Performance Measures.....	6-47

## Session 7—Item Inventory Management

<b>Order Quantities.....</b>	<b>7-7</b>
How Much to Order.....	7-7
Lot-Size Decision Rules.....	7-9
Economic Order Quantity (EOQ).....	7-13
Economic Order Quantity Formula.....	7-21
Validity of EOQ Assumptions.....	7-25
<b>Independent Demand Ordering Systems.....</b>	<b>7-27</b>
Order Point System.....	7-29
Safety Stock.....	7-35
Determining When the Order Point is Reached.....	7-43
Periodic Review System.....	7-47
<b>ABC Inventory Control.....</b>	<b>7-55</b>
ABC Principles.....	7-55
ABC Classification.....	7-57
ABC Process.....	7-57
Sample Calculation.....	7-59
Control Based on ABC Classification.....	7-63
<b>Auditing Inventory Records.....</b>	<b>7-65</b>
Periodic Inventory Audit.....	7-65
Cycle Counting.....	7-67

## Session 8—Purchasing and Physical Distribution

<b>Purchasing.....</b>	<b>8-7</b>
Types of Purchased Items.....	8-7
Purchasing Objectives.....	8-9
<b>Purchasing Activities and Participants.....</b>	<b>8-11</b>
Purchasing Activities.....	8-11
<b>Physical Distribution.....</b>	<b>8-29</b>
Scope and Value.....	8-29
Global Distribution.....	8-29
Influence of Marketing.....	8-31
Interface with Production and Finance.....	8-33
Other Factors: Distribution Channels.....	8-37
Scope of Physical Distribution Factors.....	8-37
<b>Distribution Inventory.....</b>	<b>8-39</b>
Purpose of Distribution Inventory.....	8-39
Objectives.....	8-41
Distribution Inventory Planning Systems.....	8-43
Push System.....	8-45
Distribution Requirements Planning (DRP).....	8-45
<b>Transportation.....</b>	<b>8-49</b>
Introduction.....	8-49
Reverse Logistics.....	8-55
Basic Transportation Modes.....	8-55
Costs of Moving Goods.....	8-65
<b>Warehousing.....</b>	<b>8-71</b>
Purpose of Warehousing.....	8-71
Warehousing Process and Activities.....	8-71
Stock Location Systems.....	8-73
Public Versus Private Warehousing.....	8-75

## Session 9—Lean and Quality Systems

<b>Product and Quality Systems.....</b>	<b>9-7</b>
Product and Quality Cycle.....	9-7
Objectives.....	9-7
Systems and Methodologies.....	9-9
Principles, Practices, and Tools.....	9-11
<b>Focus on the Customer.....</b>	<b>9-13</b>
Value of a Product to the Customer.....	9-15
Quality Functional Deployment.....	9-15
<b>Lean.....</b>	<b>9-17</b>
House of Toyota.....	9-17
Why Implement Lean?.....	9-17
Waste.....	9-19
Continuous Flow Production.....	9-21
Pull Systems.....	9-21
Work Layouts.....	9-23
Process Flexibility.....	9-25
Total Productive Maintenance.....	9-27
Process and Continuous Improvement.....	9-29
Employee Involvement and Empowerment.....	9-31
Lean Tools and Techniques.....	9-33
Supplier Partnerships.....	9-35
<b>Total Quality Management.....</b>	<b>9-37</b>
Product Quality.....	9-37
Quality-Related Costs.....	9-41
Quality Control Tools.....	9-43
Six Sigma.....	9-57
Summary.....	9-63

## Session 10—Theory of Constraints

<b>Introduction to Theory of Constraints.....</b>	<b>10-7</b>
Philosophy and Basic Principles.....	10-7
Types of Constraints.....	10-9
Problem-Solving Tools.....	10-9
<b>General Applications.....</b>	<b>10-11</b>
VATI Analysis.....	10-11
Drum-Buffer-Rope Planning and Scheduling.....	10-13
Simplified Drum-Buffer-Rope (S-DBR).....	10-27
Throughput Accounting.....	10-29
Critical-Chain Method.....	10-31
Distribution.....	10-33

## Appendix

<b>Progress Check Answer Sheet.....</b>	<b>A-1</b>
<b>Bibliography.....</b>	<b>A-2</b>
<b>Course Evaluation.....</b>	<b>A-3</b>
